Biography, Dan Siefert

Dan Siefert began his engineering career in 1975 at Great American Sound Company, designing high-end solid-state audio pre-amplifiers and power amplifiers. In 1983, Dan founded Siefert Research, designing, manufacturing and marketing high performance loudspeakers.

In 1986 Dan joined Harman International Industries, Inc. as a Senior Systems Design Engineer. While at Harman, Dan brought several speakers to Market for professional, consumer and computer/multi-media applications. While at Harman, Dan was assigned to the Research and Development department, reporting to Dr. Floyd Toole. Dan then focused his attention on measurement technologies and contributed to the development of Harman's advanced subjective and objective measurement techniques.

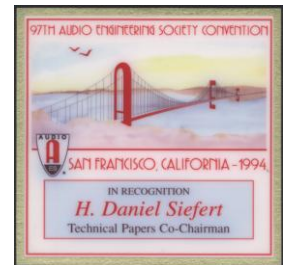

- 1987: Co-Authored an AES technical paper on motional impedance measurement of transducers with Fancher Murray. Presented at the 83rd AES Convention

- 1993: JBL Synthesis One awarded the HI-FI Grand Prix Product of the Year

- 1994: Technical Papers Co-Chairman of the 97th AES Convention

- 1996: Founded One on One Technical Products, Inc. currently providing engineering services to the Consumer Electronics Industry.
- 1998-2001: Invited to the annual CEDIA Expo to present seminars on the application of digital parametric equalizers and room measurement techniques.

Sample of Past Projects

While at Harman

- Control 10, Control 12: JBL Professional's first speaker utilizing an injection molded ABS enclosure.
- 4670B, 4675A: Dual 15" Theater systems
- JBL Synthesis Home Theater Systems: A full line of high-end speakers and electronics, including digital parametric equalization, SDEC (Synthesis Digital Equalization & Crossover) and a portable measurement system, DACS (Digital Acoustic Calibration System) for installed system calibration. This was an industry first which, to this day, is widely recognized as state-of-the-art in home theater system design.

As a Consultant (One on One Technical Products, Inc.)

- JBL Professional AE Series Subwoofers:

- Bass shaker amplifier for Aura Systems
- Infinity R.A.B.O.S. (Room Adaptive Bass Optimization System)
 - Developed CD based equalization technique
 - Authored and produced calibration CD
 - Designed specialized sound level meter for R.A.B.O.S.

Dan is a member of the Audio Engineering Society (AES), the Acoustical Society of America (ASA) and the Custom Electronics Design and Installation Association (CEDIA).

 Dan is also a certified THX Home Theater Products developer.
